

Reusable plastic trays, bulk boxes, pallets  
& dollies for short or long term rental

## Universal Dolly

Versatile handling solution

The Universal Dolly helps retailers, food processors and industrial manufacturers to ease and speed up handling operations throughout the supply chain.

Universal Dollies are ideal for retail operations to transport produce from distribution centre to in-store point of sale. Their small 800 x 600mm footprint make them ideal for stock replenishment.

The Universal Dolly is also a popular choice for manufacturers, where its compact size makes it an ideal platform for JIT deliveries and in-house handling operations.

Manufactured from polypropylene, the robust Universal Dolly safely carries loads of up to 500kg. Each dolly is equipped with 14 spring-loaded pop-ups, which safely retain trays and containers with a variety of base sizes.

The Universal Dolly incorporates two fixed wheels & two (swivel) castors, a foot brake, clover leaf recesses to stack safely when empty and a unique flip-out extension for carrying nested attached-lid containers (which have an oversized footprint when nested). An optional clip-on handle is also available.

Rental allows you to acquire what you need, when you need it. Logtek's large fleet of trays, bulk boxes, pallets and wheeled dollies ensures our customers meet day to day needs with the flexibility to address peak or seasonal demands.

# Universal Dolly *technical specification*

## Universal Dolly specification

Description:	800 x 600mm dolly fitted with load retaining pop-ups, two fixed wheels & two (swivel) castors, a foot brake and a flip-out extension for carrying nested attached-lid containers
Dimensions:	800 x 600 x 171mm
Weight:	9.7 Kg
Maximum loading:	500 Kg uniformly distributed load

## Operating instructions

For safety, operators should always be able to see over the top of the stacked crates when pushing a dolly.

The optional clip-on handle is quick and easy to attach and remove. It enables users to pull (instead of push) loaded dollies, allowing the dolly to be loaded to greater heights and the operator to inspect before moving out into aisles in the warehouse, factory or retail store.
